ALUMNI SPEAK

The programme was highly informative and eye opening. My knowledge grew not only in academics but I also learnt how to research better and more efficiently.

The lectures and sessions which dealt in detailed concepts of AI which were taught to us in point-topoint format. The TAs helped the students by holding re-cap sessions to make sure that every student understood what was explained during lectures. Overall, The program is a fun and knowledgeable and is explained in a simplified manner.

The AIYA is a programme which has given me the opportunity to see AI in a way that I had never seen before. It has provided immense knowledge to me and has enhanced my learning with theory as well as practical application.
